

Deploy React/Vite Website to GitHub Pages Without VS Code

Step 1: Extract ZIP File

Extract your E-COMMERE-main.zip file.

Step 2: Open Frontend Folder

Inside the project, open the frontend folder.

Step 3: Edit vite.config.js

Add the following configuration:

```
import { defineConfig } from 'vite'
import react from '@vitejs/plugin-react'

export default defineConfig({
  plugins: [react()],
  base: '/YOUR-REPO-NAME/',
})
```

Step 4: Upload Files to GitHub

Create a GitHub repository and upload all files from the frontend folder.

Step 5: Enable GitHub Pages

Go to Repository → Settings → Pages.
Choose:

- Source: Deploy from branch
- Branch: main
- Folder: /root

Step 6: Open Website

After a few minutes, your website will open at:
<https://yourusername.github.io/repository-name/>
